

Buttons:

Start/Stop

Reset

Show saved - ListBox with data from LocalServer

Save - Add() and SaveChanges(). Saving time to localServer

Tech:

EntityFramework, Linq, WinForm, Net7.0

Time:

4 hours. (5min for stopwatch and 3.55h to understand task and Delete trash )

This project will not show all my abilities, I did not use most of the knowledge. The project is written cleanly and without surpluses. The program supports the wishes of the client. Instead of a database, I could use any file(xml), this would probably speed up the work.
